

WAD'S WASTE UTILIZED IN NICK BUILD'S HUGE BRIDGE FROM OLD SCRAP

By utilizing waste
material, Nick
Build has
been able to
construct a
bridge which
will last for
many years.

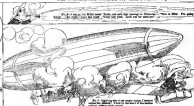

Fig. 1. A view of the bridge from the water. The bridge is made of scrap metal and is supported by two large pillars. The bridge is a masterpiece of engineering and will last for many years.

Fig. 2. A view of the bridge from the water. The bridge is made of scrap metal and is supported by two large pillars. The bridge is a masterpiece of engineering and will last for many years.
